80590 - BOND MP MET CROMO

Trade code: 80590 SWH Code: HSZ0E0006

#### **GENERAL FEATURES**

This thermosetting powder contains epoxy and polyester resins.

The product forms a level hard film with good resistance to mechanical damage.

It has good resistance to yellowing caused by the chain stop during stoving.

The metallic effect pigment is fixed on the powder by means of a bonding process, thanks to which is possible to achieve the best results in terms of application and reproducibility for the metallic effect powders. The problems of separation in the powder cloud during the application process, typical of dry blend products, are so eliminate, with positive effects on the colour constancy.

#### **APPLICATION**

Due to its special content the product has excellent protective and decorative effects. It is particularly suggested for interior coating.

To avoid variation of the metallic effect due to repeated surface rubbing, metallic pigment release on the surfaces in contact with the coating and appearence alteration due to water or chemicals, it is suggested a double coat with transparent powder.

# **ADVISED CYCLES**

The surface to be coated must be cleaned from oils, grease or flash rust.

If particular resistance to corrosion or humidity is required, it is suggested the following pretreatment of the surface:

| for steel                          | sand blasting or/and iron or zinc |  |  |
|------------------------------------|-----------------------------------|--|--|
|                                    | phosphatising                     |  |  |
| for galvanised steel and aluminium | chromatising                      |  |  |

# HANDLING AND STORAGE

Store at temperatures lower than 30°C; higher temperatures may damage the powder by causing undesired alterations or blobs.

Storage life in original package: 18 months.

# **TECHNICAL DATA**

| Code    | Int. Method                               | Range         | Ref. Method     |
|---------|---|---------------|-----------------|
| P/CL092 | Calc.specific gravity(kg/l):              | 1.177 - 1.225 |                 |
| P/CL120 | Non volatile content(w/w)(%) 3h at 105 °C | 100.0 - 100.0 | UNI EN ISO 3251 |
| P/CL125 | Non volatile content(v/v)(%)              | 100.0 - 100.0 |                 |
| P/CL143 | 1µm Theor.spread.rate (m2/kg):            | 816 - 850     |                 |
| P/CL210 | Water content (%):                        | 0.0 - 0.0     |                 |
| P/YC060 | Particle size dist. <32µm (%):            | 36 - 46       |                 |
| P/YC120 | Particle size dist. <63µm (%):            | 74 - 91       |                 |

# WAYS OF APPLICATION

Apply with automatic or manual guns with negative terminal (60/80KV).

The tribo application depends on the specific plant and must be previously evaluated.

It is advised to apply in layers with the thickness of 60-80 microns and to stove at 200°C for 10 minutes. For stoving the epoxy polyester metallic effect it is possible to use the following combinations of time and temperature:

| 10-15 minutes | 200°C (temperature of the support) |
|---------------|------------------------------------|
| 15-22 minutes | 190°C (temperature of the support) |
| 20-30 minutes | 180°C (temperature of the support) |

For stoving use the given indications.
